Residence EL Khali , Cité Saha , Borj Louzir – Ariana, Tunisia

SKILLS

Languages

- HTML, CSS, JavaScript
- PHP, SQL, JAVA
- JEE, Python, C
- XML

FrameWorks

- Angular, Spring Boot
- Eclipse, MySQL
- PostgreSQL, StarUML
- AndroidStudio, Figma

LANGUAGES

- English
- French
- Arabic

Areas of interest

- AI / ML
- Network Administration
- Network Security
- Problem solving
- Database Management

PROFILE

Experienced full-stack web developer with proven expertise in creating high-performance and user-friendly web applications. My interests now extend to the fields of artificial intelligence, cybersecurity, and networking, where I aim to leverage my programming and problem-solving skills. I possess a foundational understanding of AI and machine learning concepts, along with network and cybersecurity fundamentals. My proficiency in languages such as Python, SQL, and JavaScript, along with my ability to understand and implement complex architectures, are valuable assets for tackling the technical challenges of these domains. I am motivated to contribute to innovative projects by developing intelligent and secure solutions.

PROFESSIONAL EXPERIENCE

Full Stack Developer – End-of-Studies Internship | EL ATHIR Designed and developed a comprehensive web application for managing EL ATHIR's commercial activities, streamlining operations and improving efficiency. Utilized Spring Boot for robust backend development and Angular for a dynamic and responsive frontend. Key responsibilities included database design (MySQL), API development, user authentication, and implementation of core business logic.

EDUCATION

Bachelor of Science in Computer Science

Computer Science Bachelor's student at the Faculty of Sciences of Tunis.

2021 – 2024

Software Engineering degree

Software Engineering student at the Higher Institute of Applied Sciences and Technology of Sousse (ISSAT Sousse).

2024 – NOW

PROJECTS

- Design and development of a web application for managing health insurance using HTML, CSS, JavaScript, and MySQL, following the Scrum methodology.
- Development of an e-commerce web application for online sales of electronic and computer products using HTML, CSS, and JavaScript.
- Creation of an AI solving a maze with the Depth-First Search Algorithm.

COMMUNITY INVOLVEMENT

JCI ARIANA

Improved team communication, brainstorming, and presentation skills through active participation in JCI Ariana. Developed effective public speaking techniques, emphasizing body language and tone.

2022 – 2023
