GitHub Portfolio: github.com/AymenChaouachi | linkedin.com/in/aymen-chaouachi-0237ba219

Professional Summary

Software engineering student at ISSAT Sousse with hands-on experience in full-stack web development, AI tools, and intelligent systems integration. Experienced with Python, Spring Boot, Angular, REST APIs, SQL, Linux, and software architecture. NVIDIA certified in Conversational AI and Jetson Nano AI development. Passionate about AI automation, prompt engineering, AI agents, workflow optimization, and intelligent applications. Actively involved in AI communities, hackathons, and technical projects. Seeking a summer internship focused on AI automation, agent-based systems, and intelligent workflow integration.

Technical Skills

Programming Languages: Python, Java, Java EE, JavaScript, SQL, C, PHP, HTML, CSS

Frameworks & Technologies: Spring Boot, Angular, FastAPI, REST APIs

AI & Automation: Conversational AI, Prompt Engineering, AI Automation, LLM Fundamentals, AI Agents, Workflow Automation, NLP Basics

Databases: MySQL, PostgreSQL

Tools & Platforms: Git, GitHub, Linux, Postman, VS Code, IntelliJ IDEA

Core Concepts: Object-Oriented Programming, Software Architecture, APIs Integration, Algorithms, Data Structures, Networking, Cybersecurity Fundamentals

Certifications

NVIDIA – Building Conversational AI Applications Feb 2026

NVIDIA – Getting Started with AI on Jetson Nano May 2025

NVIDIA – Develop, Customize, and Publish in Omniverse With Extensions May 2025

AI Training Program – NATEG ISSATSO Club 2025 – 2026

Professional Experience

Full Stack Developer Intern – EL ATHIR Feb 2024 – May 2024

- Designed and developed a web application to manage commercial activities and improve operational efficiency.
- Developed backend services using Spring Boot and a responsive frontend using Angular.
- Worked on MySQL database design, authentication systems, API development, and business logic implementation.
- Collaborated in a real business environment using software engineering best practices and scalable application architecture.

Projects

AI Resume Analyzer & Job Matching Platform | Angular, Spring Boot, PostgreSQL, AI Integration

- Developed a full-stack AI-powered platform for resume analysis, ATS scoring, job matching, and career assistance using Angular, Spring Boot, PostgreSQL, and JWT authentication.
- Implemented AI-based resume analysis workflows capable of extracting technical skills, estimating ATS compatibility, generating recommendations, and tracking resume analytics dynamically.
- Designed responsive Angular Material interfaces with reactive dashboard analytics, resume history tracking, protected routes, and real-time state management.
- Integrated intelligent job description matching functionality to compare resumes against internship/job requirements and identify missing skills and improvement opportunities.
- Built scalable REST APIs, authentication systems, database persistence layers, and AI integration pipelines following modern software architecture practices.

AI-Based Maze Solver | Python

- Implemented a maze-solving system using the Depth-First Search (DFS) algorithm.
- Optimized the algorithm for improved execution speed and accuracy.

Health Insurance Management Web Application | HTML, CSS, JavaScript, MySQL

- Designed the database schema and UML models for the application.
- Applied Scrum methodology with sprint planning and collaborative task management.

Education

Software Engineering Degree 2024 – Present
Higher Institute of Applied Sciences and Technology of Sousse (ISSAT Sousse)

Bachelor of Science in Computer Science 2021 – 2024
Faculty of Sciences of Tunis

Relevant Coursework

Artificial Intelligence, Computer Vision, Big Data, Data Science, Software Architecture, Advanced Databases, Networks and Cloud Computing, Cybersecurity, Algorithms and Data Structures, Software Engineering

Leadership & Activities

Microsoft Club ISSAT Sousse – AI Branch Member 2025 – Present

- Participated in AI-focused workshops, collaborative projects, and technical activities related to AI tools and intelligent systems.
- Explored conversational AI applications, automation workflows, and modern AI technologies.

Hackathon Participant

- Collaborated in solving real-world problems related to AI, software development, and problem solving under time constraints.

JCI Ariana 2022 – 2023

- Developed teamwork, communication, brainstorming, and presentation skills through active participation in events and activities.
