

MOHAMED AYMEN CHAOUACHI

Computer Science engineering student

- Phone number: +216-234 33 444
- Email : aymen.12.2002@gmail.com
- Address: Ariana, Tunisia
- Linkedin : Aymen chaouachi
- Github : AymenChaouachi

LANGUAGES

- English
- French
- Arabic

SOFT SKILLS :

- Communication
- Teamwork
- Ability to learn quickly
- Team spirit and strong communication skills

INTERESTS:

- Sports
- Vidéo Games
- Chess

ASSOCIATIVE LIFE:

JCI ARIANA 2022 - 2023

Improved team communication, brainstorming, and presentation skills through active participation in JCI Ariana. Developed effective public speaking techniques, emphasizing body language and tone

PROFILE :

Experienced full-stack web developer with proven expertise in developing high performance, user-friendly web applications. My interests now extend to AI, cybersecurity, and networking. I possess a foundational understanding of AI/ML concepts, along with network and cybersecurity fundamentals. Experienced in Python, SQL, and JavaScript. skilled in implementing complex architectures. Motivated to contribute to innovative projects by developing intelligent and secure solutions.

PROFESSIONAL EXPERIENCE :

Full Stack Developer - End-of-Studies Internship | EL ATHIR (February – May 2024)

- Designed and developed a comprehensive web application for managing EL ATHIR's commercial activities, streamlining operations and improving efficiency. Utilized Spring Boot for robust backend development and Angular for a dynamic and responsive frontend. Key responsibilities included database design (MySQL), API development, user authentication, and implementation of core business logic.

EDUCATION:

- the Higher Institute of Applied Sciences and Technology of Sousse (ISSAT Sousse)
Software Engineering degree
2024-2025 (Currently pursuing)
- the Faculty of Sciences of Tunis.
Bachelor of Science in Computer Science
2021 - 2024

SKILLS:

- Programming:
 - C, Python, Java, Java EE
 - HTML, CSS, JavaScript, PHP, XML
 - SQL
- Software:
 - Microsoft Office (Word, Excel, PowerPoint, etc.)
- Operating Systems:
 - Windows, Linux

PROJETS :

- Health Insurance Management Web Application **February – May 2023**
 - Technologies: HTML, CSS, JavaScript, MySQL | Methodology: Scrum
 - Designed the database schema with UML and data models using MySQL.
 - Followed the Scrum methodology (sprints, backlog, meetings).
- E-Commerce Web Application for Online Sales of Electronics **November 2022**
 - Technologies: HTML, CSS, JavaScript
 - Designed the website structure and layout using HTML and CSS.
 - Developed interactive features with JavaScript (shopping cart, search filters).
- AI-Based Maze Solver **May 2023**
 - Technologies: Python | Algorithm: Depth-First Search (DFS)
 - Implemented the DFS algorithm for automatic maze solving.
 - Optimized performance and fine-tuned the algorithm for better accuracy and efficiency.
